I. OVERVIEW

a) ABOUT THE SYSTEM

ICTU Service Request Information System is an online system that allows the client to report an issue and make a **request** regarding any **repair** on IT hardware and software, internet or network connectivity, **technical assistance** on DOH Health Information Systems as well as EV-CHD in-house information systems, and **Video Conferencing** through providing their contact information, detailed request description and other comments. This is in line with the quality objective of the Information and Communications Technology (ICT) Unit which is to respond to ICT services requests and provide resolution/recommendation regarding specific problems with a product or service is requiring the DOH EV-CHD to use this system. It also aims to streamline and prioritize the IT technical support need.

II. HOW TO ACCESS DOH EVCHD INTRANET

- Open your preferred internet browser - e.g. Chrome, Mozilla, Opera, etc.

- Enter the Intranet URL http://intranet.chd8.doh.gov.ph in the address bar as shown below

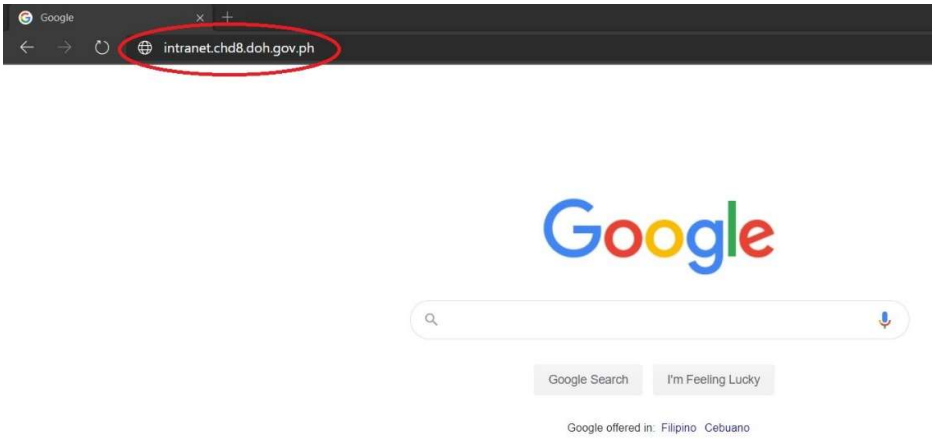

Fig 1.0

- Hit enter to access the DOH-EVCHD Intranet's Login Page

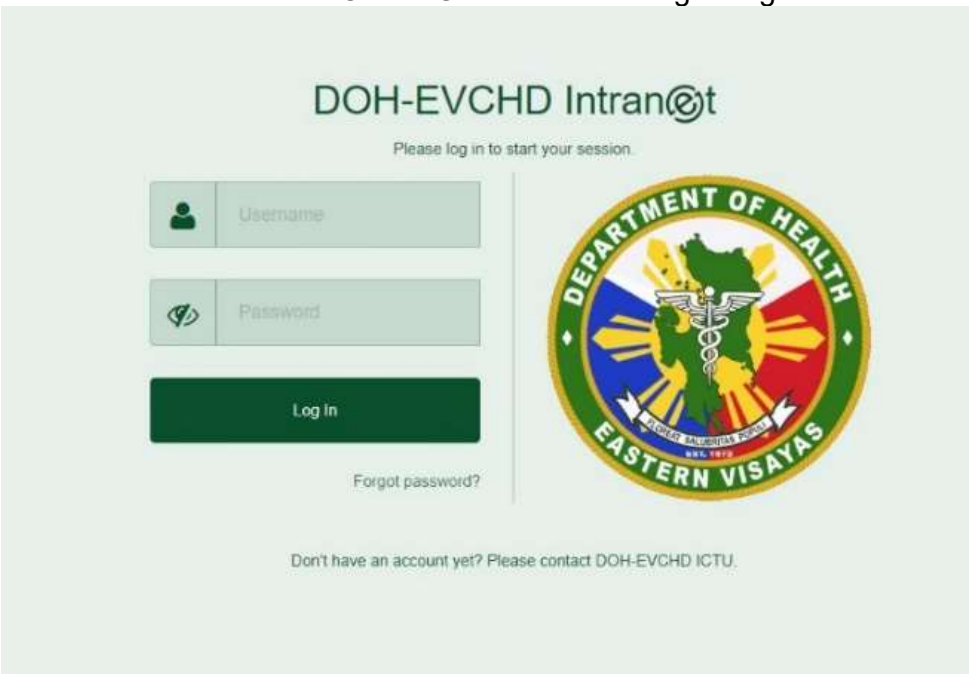

Fig 1.1

III. LOG-IN TO INTRANET

a) User Accounts

User Accounts shall be provided by the System Administrator in the MSD-ICTU Office. Once the user account has been created and activated, it shall be used immediately to log-in to the DOH-EVCHD Intranet.

b) How to Log-in

In the DOH-EVCHD Intranet Log-in Page, enter your **username** and **password then click the submit button.**

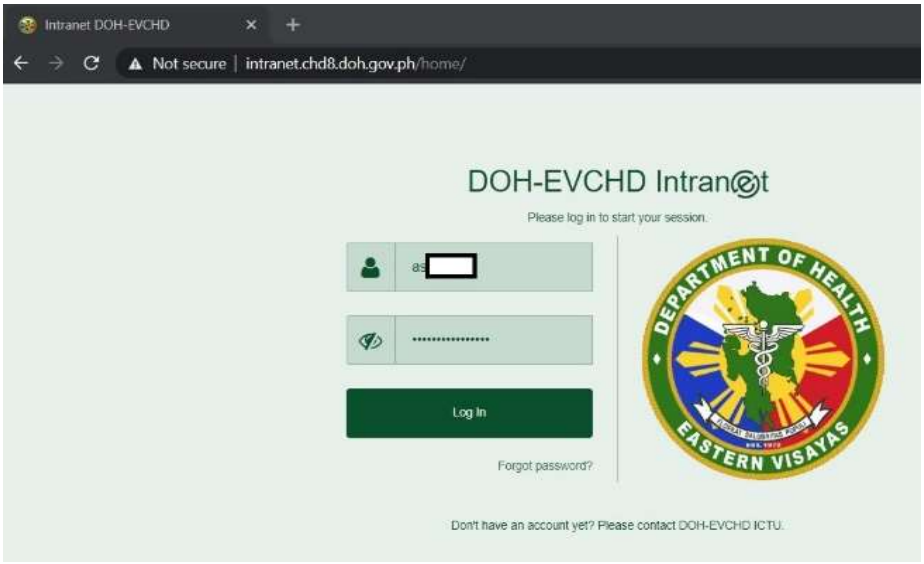

Fig 2.0

For newly registered users, a successful log-in will redirect you to the home page of DOH-EVCHD Intranet. **Note: You can always change the default password for security purposes**.

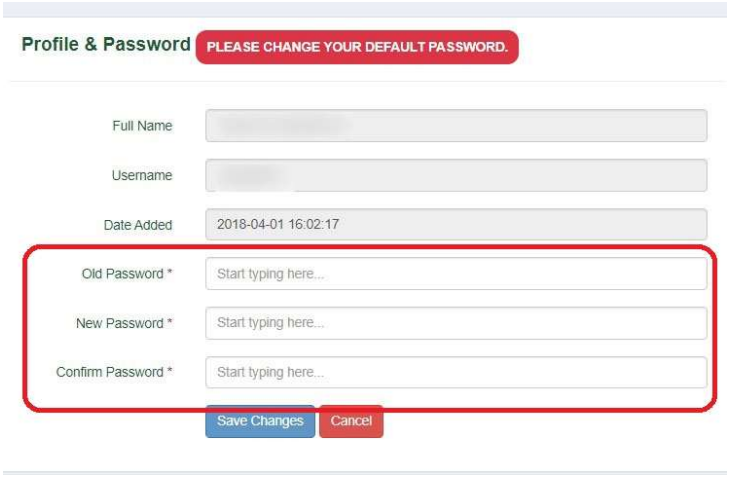

Fig 2.1

- Go to **Systems Tab**, look for **ICTU Service Request Information System** and click the link. This will redirect you to the home page of ICTU Service Request Information System.

Fig 2.2

Fig 2.3

- A successful log-in will redirect you to the home page of Service Request Information System.

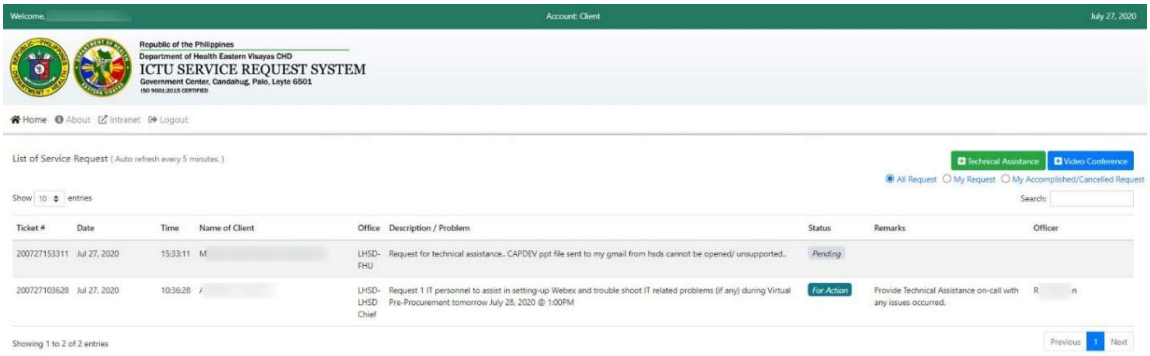

Fig 2.4
